EXPERIENCE

Software Engineer

IB Space

May 2024 – Present

Ariana, Tunisia

- Design and develop an API Gateway for user account management.
- Use RabbitMQ to handle asynchronous messages between services.
- Manage user account addresses including creation, update, and deletion.
- Handle file uploads with various file types.
- Calculate sums and process uploaded file formats.
- Calculate and manage company certificates.

FullStack Developer (Laravel / Angular)

SOFTWIND

September 2022 – May 2024

Ariana, Tunisia

Project: FM-Inspection

- Design, develop, and deploy a web and mobile application to monitor objectives, KPIs, and quality metrics from field inspections.
- Develop REST APIs in Laravel to be consumed by Flutter mobile applications.
- Implement user management, building management, clusters, and office management.
- Develop a scheduling module to set appointments for inspectors.
- Automatically generate reports after each inspection.

Project: Dashboard EHC

- Design, develop, and deploy a web application for project management.
- Manage project classifications, stages, and bid type templates, including their relationships.
- Allow input of multiple stages for each project to track progress.
- Implement Excel import/export functionality with automatic checks and calculations.
- Create interactive dashboards with pie charts, line charts, and bar charts.

Project: Tunisian Football Federation (FTF)

- Design and implement a complete system for managing referees, fields, leagues, and teams.
- Develop a match management module including scheduling, referee assignment, and result updates.
- Implement accounting module to calculate referee payments based on their address and field location.
- Integrate Google Maps API to automatically determine distances between referees and fields to optimize allowances.

FullStack Developer (Laravel / Angular)

WELYNE

February 2022 – August 2022

Center Urbain Nord, Tunisia

- Design and develop a modular ERP for multi-company management (final year project).
- Develop core modules: user management, categories, products, invoices, and communication modules (chat and chatbot).
- Implement clear and well-structured static modules for better organization and maintenance.

EDUCATION

Engineering Cycle in Computer Science
Private Higher School of Engineering and Technology – ESPRIT, Ariana
📅 2019 – 2022

Bachelor in Management Information Systems
Higher School of Digital Economics (ESEN), Manouba
📅 2016 – 2019

SKILLS

Spring Boot

Laravel

Angular

React

Maven

Docker

Jenkins

SonarQube

Nexus

Git/GitLab

SOLID

Clean Code

MVC

PHP

JavaScript

jQuery

Ajax

HTML5

CSS3

Bootstrap

SQL / MySQL

CERTIFICATIONS

GOMYCODE
Front End Developer – React JS Certified
📅 2024

TEKUP
RHCSA – Red Hat Certified System Administrator
📅 2025

- Acquired advanced Linux administration skills: user management, permissions, services, and security.
- Mastered Linux commands, filesystem management, package management, and network configuration.
- Prepared for and successfully obtained the official Red Hat certification.
